

HealthWay CLEAN STATION

*Doctor recommended,
CLEAN STATION room air purifier
uses a patented air cleaning
system that is designed to be
99.99% efficient in capturing air
particles at .3 micron size or
larger—that is 4x the particle
capture of a similar-sized
HEPA unit.*

- FDA Listed Class II Medical Device.
- Exclusive 8-Stage Filtration System with a powerful 6-Stage Chemical Absorption filter.
- Better than HEPA efficiency.
- Optional Handheld Remote.

*Disinfecting Filtration System

How Does the Clean Station DFS Work?

The Clean Station traps allergy-causing particles such as dust, mold, pollen, dust mite debris and pet dander. Clean Station is also effective at destroying microorganisms including viruses, bacteria, mold, and fungi spores. **Clinical tests have verified microorganism destruction of 94% or higher.**

Additionally, the Clean Station has a super adsorbent six-stage filter that will reduce harmful chemicals, gases and smoke, as well as household odors. Clean Station also works silently and, at only 34 lbs., is very portable. It plugs into any standard outlet and is effective for up to 1500 sq. ft. of coverage.

Understanding Air Purification

Did you know that the EPA has found that the air within homes and other buildings can be more polluted than the outdoor air—even in the largest and most industrialized cities?

Government research also indicates that people spend approximately 90 percent of their time indoors, for many people, the risks to health from indoor air quality may be greater than the risk from outdoor pollution.

Energy Star qualified room air cleaners use less energy to remove particles, such as dust and pollen from indoor air.

What can I do to protect my family and home against airborne contaminants?

Doctors recommend the **Clean Station** as the world's most advanced medical grade air cleaning system.

Imagine. . .

...a 90% cleaner home in just 30 minutes! Say good night to dangerous indoor contaminants.

The **Clean Station** is the world's most powerful Disinfecting Filtration System with a germ killing destruction rate of 94% or higher and a better than 99.99% particle capture at 0.3 micron size.

Better Than HEPA Efficiency!

Technical Specifications

- FDA listed Class II Medical Device (ISO9001:2 • CE • CSA • UL • EMI)
- Independent medical lab test indicates:
 - Virus killing rate of 99% or higher
 - Bacteria kill rate of 98% or higher
 - Mold/Fungi kill rate of 94% or higher
- System includes an exclusive 8-stage filtration system with a powerful 6-stage chemical adsorption filter for VOC/gas scrubbing
- Each unit is individually tested and certified to be better than HEPA efficiency
- Meets Energy Star Specifications for room air cleaners.
