GUTTERS THAT LOVE THE RAIN™

---

---

## REMEMBER WHEN RAIN MADE YOU HAPPY?

---

When a puddle was a source of pure pleasure?

RainPro's new Design Series gutters just may reawaken some of those feelings. Because RainPro™ is the gutter system that gives your home added beauty, and you, real peace of mind.

The key to RainPro's uniqueness is that it is a large capacity gutter system that creates maximum water flow, without looking large. With more water flow, RainPro gives your home ultimate protection *and* real curb appeal.

Our unique, architectural styling was designed to complement the look of today's homes. It achieves high-volume water flow without having to resort to a bulky looking gutter system.

You'll love the way your house looks with RainPro gutters, and how good you'll feel. Especially when it rains.

---

# THE RAINPRO™ SYSTEM

---

**Better Design** • Each component of the RainPro system, from the miters and end caps to the hidden hangers, was designed to achieve a totally refined look. RainPro's unique architectural profile looks like part of your house, and not something that was added on.

**Custom Fit** • All RainPro gutters are seamless. They are custom formed and cut to exact dimensions *at your home* to ensure a perfect fit.

**Maximum Flow** • Compared to standard gutters, RainPro has a larger gutter bottom and downspout, which helps remove rainwater from your roof faster, to better protect your home.

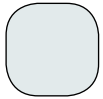

**Maximum Strength** • RainPro gutters and downspouts are made from a heavier gauge metal than standard gutter systems, and are erected with heavy-duty hangers for maximum strength.

**Color Choices** • Searching for that special color to complement your home? RainPro is available in a wide range of designer colors.

**ScratchGuard™ Finish** • The RainPro gutter system is protected by Englert's exclusive ScratchGuard paint finish, and comes with a limited lifetime warranty.

RainPro's wider gutter bottom and larger 3 3/8" outlet together give you a dramatic increase in water flow capacity over the standard gutter and outlet.

Heavy-duty internal gutter hangers give your gutter system maximum strength and durability, yet are totally concealed from view.

\* Colors are for reference only. Actual color finishes may vary.

RainPro gutter systems are made from a heavier gauge aluminum for added strength. The gauge used is .032 versus the typical .027, which means that RainPro gutters are 18.5% thicker than standard gutters.

Protected by Englert's exclusive ScratchGuard™ paint finish, and backed by a limited lifetime warranty.
